Monthly Feature: You Control the Volume

By Debbie Waitkus

On November 21st, 1877, Thomas Edison invented the phonograph. How many of today's teenagers do you suppose have used a phonograph or even know what it is? Come to think of it, most teens probably don't know what an 8-Track cassette is either. Today teens and adults alike listen to music on iPods, MP3 players, computers — some even listen on car radios! But whether you own a record player or an iPod, it's not important *how* you hear things but rather *what* you hear.

Photo by Ron Trimarchi

For example...When was the last time someone told you that you couldn't do something you wanted to do or believed you could do? Perhaps your boss pulled you off a project or wouldn't approve an expenditure that you anticipated would be a slam dunk. Maybe your spouse wouldn't join you for an event you wanted to attend. Did the "no" stop you in your tracks? Perhaps.

"Our doubts are traitors, and make us lose the good we oft might win, by fearing to attempt."

- William Shakespeare

You hear all kinds of voices and messages everyday, thousands of them, and sometimes they even come from within — your own voice!

Lining up the putt

Imagine that you are on the green of the 18th hole. You really want to sink this putt – if you make it, it’s a par and you’ll leave on a very good note. Crouching behind the ball you line it up. A four-footer. You’re close enough to think you should make it without difficulty — and just far enough for it to be a bit of a knee-knocker. It’s downhill and you believe the ball is going to break from right to left. Hmmmm. How much break? Oh, and how firmly to hit the ball? Boy, you really want to make this putt! Four feet. *Time out!* Are you beating yourself up for not hitting your approach shot a little closer and below the hole instead of above it? Where’s your confidence? The rest of the foursome is watching you. Watching you. Watching you. Do you see the line the ball is going to take or are you simply hoping it might go in?

As you encounter the variety of voices coming at you (especially your own), know that you can choose what you actually hear. Call it selective attention and selective retention. Just as with an iPod or radio, the volume and selection is in your hands. You can turn it up, and you can turn it down.

Here are two examples of people who have learned to control the volume – Amy and Steve.

Amy, during her freshman year at University, has learned the power of selective attention and

selective retention. She is a student athlete at Bentley University in the Boston area. Blessed with height, she plays volleyball.

In case you don’t already know, the recruitment process for collegiate sports is long and “interesting.” Can you imagine needing to play well with the scouts’ eyes on you! Like your tee shot on the first tee with everyone watching!

The Bentley University coach pursued Amy and did a great job of marketing the school and its volleyball program. Amy turned the volume on the Bentley University dial way up! She made her choice.

Yet it didn’t take long for reality to set in. No longer being recruited, Amy began to have reservations. The coach had changed her tune. Did the coach truly like her? (*Unusual question for a teenager?*) Amy questioned coaching strategy and approach. By mid-season she learned that her coach was a yeller – not on the court but behind closed doors – in the office. Amy wondered, *Can she be demeaning me in an effort to motivate me?*

Selective attention, selective retention. How to turn down the volume of the coach?

Turn up the volume on another voice! Realizing that she wasn’t being motivated by her coach, Amy not only turned down the volume, she also changed the station! She reached out to prior coaches for advice. One suggested that

Amy on the court

she self-motivate by focusing on her hitting statistics, which is what she did. She had a successful season – a regular starter,

finished the season #2 on the team in hitting statistics and was honored on the NE Conference All-Freshman team. Turn up that dial!

Steve Nash (Phoenix Suns) is another athlete who knows how to control the volume. He boasts one of the highest free throw shooting percentages in the NBA. Each time he steps up to the free-throw line he executes a pre-shot routine. He bounces the ball several times, feigns a shot without the ball, focuses and shoots.

What do you suppose he tells himself during his pre-shot routine? *It's going in, it's going in!* Turn the volume way up! He knows the ball is going in. His high free-throw percentage is evidence of that. And if by chance he misses, what do you think Steve tells himself the next time he steps up to the free throw line? *It's going in!* He's doesn't say to himself, *I better not miss this.* He's focused and says, *It's going in.*

Now it's your turn. You're back on the 18th green standing over that 4-foot putt. What are you saying to yourself? Do you see the line? It's

Bower Youssef – knocking in the putt!

inside right, and firm...right? Not sure? Are you clear in your mind as to how much break the ball is going to have? Ready? Do you feel confident that the ball is going to drop in the cup? Do you half expect to miss the putt? Turn off the negative and listen for the positive. *Listen!* Someone in your group is saying, *You got this, just knock it in.*

Thomas Edison's phonograph aside, there are all kinds of voices all around. Exercise selective attention and selective retention. Just as you do

with your iPod or radio, your boss or a colleague, control the volume, It's entirely in your hands.

Now stand back over that putt and knock it firmly into the back of the cup! Never a doubt.

Teeing It Up With...

Larry Wilk
Jaburg/Wilk

What got you started playing golf?

I didn't really get started until later in life. It looked like a good way to relax and be outdoors, which it is. And I played a little as a kid in Ohio, but not much. As far as TTFN goes, I've been involved from the beginning. I represented Mortgages, Ltd., when Debbie was President there. When she left and started TTFN, I was

one of the first people she contacted. I think there were about 20 of us originally. Beth Cohn (Jaburg/Wilk attorney) mentioned to me one day that she played golf, so I got her involved too. One of TTFN's goals was to help women be more comfortable on the golf course, particularly playing with men.

You had a serious leg injury 18 months ago. Have you recovered and did it affect your golf game?

I'm happy to say I am fully recovered. Did it affect my golf game? I'm not sure. Well, yes — it gave me an excuse! I sure missed playing during my recovery, I can tell you that. I especially missed playing at my club, because I was getting charged every month even though I wasn't there.

Do you use golf as a marketing tool?

Absolutely. Golf is such a good marketing tool — much better than, say, lunch. When you go to lunch with a person, you have only about an hour — too short to make a real impact. With golf, a person is stuck with you 4-5 hours and you get an opportunity to judge the person's character by the way he or she plays golf.

TTFN has been good for us. Our best business has come from our association with TTFN. Jaburg/Wilk will bill hundreds of thousands of dollars this year that can be directly linked to TTFN relationships.

Do you see any similarities between playing golf and practicing law?

At times both can be very frustrating. But, rewarding, too. I have to say my practice of law has been a little more rewarding than playing golf lately.

Do you have a goal when you play?

My goal is to break 90. If I finish in the 80s, I feel like I've had a good round.

Do you have a favorite TTFN memory?

Yes. Discovering that mixing vodka with red Gatorade improves your golf game. It happened when they ran out of cranberry juice. The thing is, it's sort of like a Sea Breeze, except that this gives you all the essential nutritional ingredients for the whole day.

Larry Wilk is a shareholder with Jaburg/Wilk. According to Larry, he creates a relationship of trust and confidence. Clients know he's there for them and that he has a genuine interest not only in their case but also in them. The practice of law is like a chess game. He enjoys analyzing a problem and then attempting to form a solution by anticipating the opposing party's strategy and responding accordingly—but always with reaching his client's goals in mind. www.jaburgwilk.com

Please tell us your reasons for playing golf, send us an email for possible publication. In the meantime, take time to hit some balls, enjoy life, focus on fun and Turn Golf Into Gold!®

Nine and Wine

Nine and Wine is a golf mentoring program - a casual golf experience, designed especially for

new golfers, returning golfers, and rusty golfers - to help them feel "at ease on the tees." Play up to nine holes with a mentor in your foursome. It's a great way to safely transition from the driving range to the golf course. The group gathers in the clubhouse after golf for "wine" (not "whine"), hosted appetizers, beverage, golf talk, and

networking. Each participant receives a copy of the lessons learned via email after the event.

Venue:

Continental Golf Course, Scottsdale

Recent Nine and Wine "Lessons Learned"

Responsibility for the Flagstick

Generally, once on the green, the player whose ball is closest to the hole is responsible for pulling the flagstick from the hole. Remember to place it on the ground where it is not in danger of being hit by an errant putt (that would cause the other player penalty strokes) or where it might disturb another player. Note that you want to lay the flagstick onto green – don't throw it down or drop it. You don't want to dent the surface of the green with the flagstick. Also, it is generally the responsibility of the player who has "holed out" first (put their ball in the hole) to place the flagstick back in the hole once all of the players in your group have holed out. Remember, there are always exceptions in order to keep a good pace of play.

Judging How Hard to Putt the Ball

Sometimes it's hard to know how hard to putt the ball so that it stops close to the hole, or better yet, drops into the cup. The putting stroke is like a pendulum swing where your shoulders help make the stroke, not your wrists.

One suggestion is to find your benchmark.

"Thank you for letting me join the fun Sunday. It gave me a chance to actually play the game without feeling out of place and pressured. I know I have my work cut out for me, but it made me realize I can do something with it. You guys have a good thing going with the program."

Before your round, find a flat area on the putting green and make a few putts where your swing is from toe-to-toe. Watch how far your ball rolls. If your putt rolls 6 feet, you know that you will need a shorter stroke when you are closer than 6 feet to the hole.

Shotgun Start

A *shotgun* start indicates that each foursome starts on a different hole. Everyone starts at the same time and, thus, finishes approximately at the same time. If you do not start on hole #1, after playing the 18th hole, you are not finished. Drive toward the clubhouse and go to hole #1.

Sometimes a tournament will have more teams than there are holes to start on. In these cases, they will start "A" and "B" groups on the same hole. The "A" group tees off first, followed by the "B" group.
